

Quick Web Application Development using JBoss Forge

Agenda

- A bit of Forge history
- Forging a Java EE Application
- Scripting Forge
- Extending Forge with Add-ons
- Conclusion

Daunting? What Do You Mean?

Startup Cost

Details

Application Client Container	Java Persistence	Java SE	
	Management		
	WS Metadata		
	Web Services		
	JAX-WS		SAAJ
	JAX-RPC		

Web Container	JSR 330	Java SE	
	Interceptors		
	Managed Beans		
	JSR 299		
	Bean Validation		
	EJB Lite		
	EL		
	JavaMail		
	JSP		
	Connectors		
Servlet	Java Persistence	Java SE	
	JMS		
	Management		
	WS Metadata		
	Web Services		
	JACC		
	JAX-WS		SAAJ
	JAX-RPC		

EJB Container	JSR 330	Java SE
	Interceptors	
	Managed Beans	
	JSR 299	
	Bean Validation	
	Java Persistence	
	JTA	
	Connectors	
	JMS	
	Management	
EJB	WS Management	Java SE
	Web Services	
	JACC	
	JASPIC	
	JAXR	
	JAX-RS	
JAX-WS	JAX-WS	SAAJ
	JAX-RPC	

Integration

Gotchas

<http://jboss.org/forged>

Carve out a project, work it into shape

Conclusion

- Getting you started quickly
- Hide you from gory details
- Extreme extensibility
- Ability to run in IDEs
